Sizing the Facility

Toward a New Healthcare Design Vocabulary

Wall-mounted retractable workstation ▲

The Multi Compartment Computer WorkStation by Proximity Systems has a durable wood construction and curved edges to create a sophisticated furniture design available in hundreds of finishes. The wall-mounted, retractable computer WorkStations have a narrow profile and can also be recessed, which frees corridors and high-traffic spaces from dangerous clutter and obstacles. These WorkStations improve workflow, enhance efficiency, and optimize floor space by integrating equipment, meds/supplies, and patient information at point-of-care.
